CONSENT FOR TESTING

The information I have provided on this form is accurate. I authorize HUC Diagnostics Laboratories to release the results of this test to my treating physician or facility. I hereby authorize my insurance or other payment to HUC Diagnostics Laboratories for services I receive. I am aware that HUC Diagnostics Laboratories may be an out of network provider with my insurer. I am aware that I am responsible for all co-pays and deductibles not covered by insurance or other payers.

Patient Signature:

MEDICAL NECESSITY

As part of my antibiotic stewardship policy, I find it medically necessary to rapidly determine and differentiate a viral and/or bacterial infection in order to treat with or without appropriate antibiotics. Having the most accurate and timely data available to me directly guides my treatment and patient management. Empiric treatment and management leads to inappropriate and unnecessary antibiotic use (50% according to the CDC) and delayed diagnosis which can lead to severe consequences.

This test was developed, and its performance characteristics determined by Hometown Urgent Care. It has not been cleared or approved by the US Food and Drug Administration (FDA). The FDA does not require this test to go through premarket FDA review. This test is used for clinical purposes. It should not be regarded as investigational or for research. This laboratory is certified under the Clinical Laboratory Improvement Amendments (CLIA) as qualified to perform high complexity clinical laboratory testing. These panels detect the presence of pathogens and must be evaluated with clinical symptoms to diagnose disease.

Historian: Self

Triage Notes:

- PT WAS SEEN IN THE ED X 5 DAYS AND WAS DIAGNOSED WITH A BLADDER INFECTION AND WAS ON CEPHALEXIN, PT STATES HER BACK IS NOW HURTING AND SHE IS CONCERNED FOR A KIDNEY INFECTION.

History of Present Illness:

| SUBJECTIVE

On Wednesday, the patient presented with RUQ pain and was referred to the emergency department. There was concern for pancreatic involvement, but this was ruled out. It is believed a kidney stone was stuck and subsequently passed later that night. The patient was diagnosed with a bladder infection and prescribed Keflex. Yesterday and especially today, the patient reports onset of back pain on the side, with a history of prior kidney infections on the right side, including a previous episode requiring ICU admission. The patient is unable to recall the duration of the ICU stay. The current back pain is described as running along the same area as previous infections, with the presence of a bladder infection raising concern. No fevers are reported. The patient reports discomfort but not significant pain on examination. No abdominal pain is reported. Soreness in the area resolved after a day or two. The patient is concerned about progression to kidney infection. When initially evaluated in the ER, patient did not have frequency or burning with urination- just the lower back pain. The R flank pain started about 2 days ago.

Complaint:

- The patient presents with a chief complaint of **pain** of the **right mid-back** since **6 days ago**.

Review of Systems:

*The patient **complains of** the following recent symptoms:*

- *Constitutional:*
 - **pain: See HPI**

| REVIEW OF SYSTEMS

- No fevers
- No abdominal pain
- Back pain present
- Urinary symptoms associated with bladder infection
- No significant pain on palpation, only discomfort

Allergies:

- **aspirin:** Drug allergy.
- **latex:** Drug allergy.

Medications:

patient specifies no active medications

Problem List:

- **Generalized anxiety disorder (status Active)**
- **Right lower quadrant pain (status Active)**

Surgeries:

patient specifies no surgeries

Diagnoses:

- Other specified symptoms and signs involving the digestive system and abdomen (R19.8)

Medication Orders:

- Prescribed: ciprofloxacin HCl 500 mg tablet; Take 1 tablet (oral) 2 times per day for 10 days; Total Qty: 20 (twenty) tablet; 0 refill(s); Substitutions allowed; Earliest Fill Date: 08/25/2025

ePrescribed at 4:01 PM on 08/25/2025 by Gabrielle Cardamone, PA

Prescription sent to CVS/pharmacy #3353 (P: 440-282-9189 F: 440-960-1629) 3288 OBERLIN AVENUE, LORAIN, OH, 44053

Plan:

- -stop keflex, start cipro.

- Please follow up as directed with PCP if not improving over next 3 days; ER if worsening.

Medical Decision Making Notes:

42yo F with known UTI presenting with concern for progression despite keflex, evidenced by R flank pain starting 2 days ago. Due to history of pyelonephritis in past, will change abx regardless of UA in office being unremarkable; cx pending to r/o resistance. Stop keflex, start cipro. Afebrile, nontoxic, very mild R CVAT. No evidence of systemic pyelonephritis, nephrolithiasis, or sepsis. No evidence of acute abdomen. Discussed etiology and rationale for treatment. Advised increased water intake, cranberry juice, and avoidance of caffeine. Pt verbalized understanding and intent to follow treatment plan. D/c in stable condition with no further questions/concerns, and no evidence of acute impending compromise. Plan reviewed in depth, further instructions provided on discharge PPW. Will follow up with primary care if not improving with treatment, ER if worsening.

Complexity of Medical Decision Making Documentation & Code Summary

	Type	Code	Description
	E/M	99214	Suggested E/M = 99214 using 2021 guidelines MDM=Moderate Complexity (DX=Mod; Risk=Mod; DR=Lim)
Presenting Problem: No Problem Associated			
Diagnosis	ICD10	R19.8	Other specified symptoms and signs involving the digestive system and abdomen (Dx/Prob Morbidity Threat=Mod; Illness, Acute, Continued illness and systemic symptoms very likely

without treatment)

Medical Decision Making

Visit type: 99214 - Office Visit Level 4 (Established Patient)

Risk (highest option considered): Moderate
Prescription Drug Management

Data Reviewed: Limited
2 unique test(s) ordered

MDM Notes: 42yo F with known UTI presenting with concern for progression despite keflex, evidenced by R flank pain starting 2 days ago. Due to history of pyelonephritis in past, will change abx regardless of UA in office being unremarkable; cx pending to r/o resistance. Stop keflex, start cipro. Afebrile, nontoxic, very mild R CVAT. No evidence of systemic pyelonephritis, nephrolithiasis, or sepsis. No evidence of acute abdomen. Discussed etiology and rationale for treatment. Advised increased water intake, cranberry juice, and avoidance of caffeine. Pt verbalized understanding and intent to follow treatment plan. D/c in stable condition with no further questions/concerns, and no evidence of acute impending compromise. Plan reviewed in depth, further instructions provided on discharge PPW. Will follow up with primary care if not improving with treatment, ER if
